

Training, teaching and learning embedded in Strategic Partnerships

Strategic Partnerships may also organise training, teaching and learning activities of individuals, in so far as they bring added value in the achievement of the project's objectives. Some of these activities are particularly relevant in one or more fields of education training and youth, and notably

Type of activity	Particularly relevant for
Blended mobility of learners	All fields of education, training and youth
Short-term exchanges of groups of pupils	School education
Intensive Study Programmes	Higher education
Long-term study mobility of pupils	School education
Long-term teaching or training assignments	Higher education, VET, School and Adult education
Long-term mobility of youth workers	Youth
Short-term joint staff training events	All fields of education, training and youth

The sections below, provide additional descriptions of the activities listed above.

Learners

Intensive Study Programmes (5 days to 2 months)

An Intensive Study Programme (ISP) is a short programme of study which brings together students and teaching staff from participating higher education institutions as well as other relevant experts/specialist/professionals in order to:

- encourage efficient and multinational teaching of specialist topics;
- enable students and teachers to work together in multinational and multidisciplinary groups and so benefit from special learning and teaching conditions not available in a single institution, and to gain new perspectives on the topic being studied;
- allow members of the teaching staff to exchange views on teaching content, new curricula approaches, to test innovative teaching methods that could eventually become part of a newly devised joint course or curriculum in an international classroom environment.

Desirable features of an ISP are the following:

- ISPs should provide significantly new learning opportunities, skills development, access to information and to state-of-the art research results and other knowledge, etc. for the participating teachers and students;
- the workload of participating students should be recognised through ECTS credits (or equivalent system);
- ISPs are expected to use ICT tools and services to support the preparation and follow-up of the ISP, thereby contributing to the creation of a sustainable learning community in the subject area concerned;
- the ratio of staff to students should guarantee active classroom participation;
- a balance should be kept between the participation of transnational and national students and staff;
- the ISP should present a strong multidisciplinary approach, fostering the interaction of students from different academic disciplines;
- in addition to the learning outcomes on subject-related competences, ISPs should favour the transfer of transversal competences.

The selection of ISP participants (teaching staff and students) is carried out by the Strategic Partnership consortium.

The number of teaching and training hours must ensure that the majority of time spent abroad is related to education and training and not to research or any other activity.

Blended mobility of students, trainees, adult learners, school pupils, young people (5 days to 2 months of physical mobility)

Activities that combine one or more short periods of physical mobility (up to 2 months in total) with virtual mobility (i.e. the use of information and communication technologies such as collaborative workspaces, live streaming, videoconferencing, social media, etc. to complement or prolong the learning outcomes of physical mobility).

It can be used to prepare, support and follow up physical mobility. It can also be organised to address people with special needs or with fewer opportunities to help them overcome the barriers to long-term physical mobility.

Short-term exchanges of groups of pupils (5 days to 2 months)

Short-term exchanges of groups of pupils can be organised between schools from different countries participating in the same Strategic Partnership. During such events, pupils work together in one of the partner schools and can be hosted in each others' families. Joint project work during the visits should be linked to the aims of the Strategic Partnership.

Please note that the cooperation between schools in a partnership should not be limited to such events but also include common online and local activities. Schools are encouraged to use eTwinning in order to work together on the project before and after the mobility events.

Pupils undertaking short-term exchanges should always be accompanied by adults to ensure their protection and safety, as well as their effective learning during the mobility experience.

Joint project work events during the visits should give pupils and teachers in different countries an opportunity to work together on one or more topics of mutual interest. They help pupils and teachers to acquire and improve skills not only in the topic or subject area on which the project is focused, but also in terms of teamwork, intercultural learning, social relations, planning and undertaking project activities and using information and communication technologies (ICT).

Participating in joint project work with groups of pupils from partner schools from different countries also gives pupils and teachers the opportunity to practice foreign languages and increases their motivation towards language learning.

Project activities should ideally be integrated into the regular activities of the schools and be included in the curriculum of participating pupils. Pupils should be able to be involved in all phases of the project, including the planning, organisation and evaluation of activities.

Long-term study mobility of pupils (2 to 12 months)

The aim of the activity is to strengthen the cooperation between the schools involved in the same Strategic Partnership. The mobility activities should be linked to the aims of the Strategic Partnership and need to be embedded in the project design. Schools are encouraged to use eTwinning in order to work together on the project before, during and after the mobility activities of pupils.

These measures should help in maximising the impact on participating schools. The activity also allows pupils to develop their understanding of the diversity of European cultures and languages, and helps them acquire competences necessary for their personal development.

The schools involved in the partnership should work together on developing learning agreements, recognising the studies undertaken at the partner school abroad and strengthening the European dimension in school education. This activity should also be a valuable international pedagogical experience for the teachers involved in the organisation and implementation of the mobility.

Participants are selected by the schools. They need to be pupils aged at least 14 and be enrolled full-time in a school participating in the Strategic Partnership. Selected pupils can spend between 2 and 12 months in a receiving school and a host family abroad.

A reciprocal exchange of pupils between schools/host families is encouraged but is not compulsory.

All actors involved in the study mobility – schools, pupils, their parents and host families – should consult the specific Guide to Study Mobility of Pupils which aims to help them in implementing the activity and ensure the safety and well-being of the pupils involved.

The Guide specifies roles and responsibilities, gives guidance and provides the necessary templates and forms for participants. The Guide is available in English at the Europa website and in translation at the website of the relevant National Agency.

Online linguistic support

Participants in long-term mobility activities (2 to 12 months) within a Strategic Partnership can benefit from linguistic preparation. In this regard, an online linguistic support will be gradually implemented in the course of the Programme. Such online support is made available by the European Commission to selected pupils, with a view to assess their competence in the language they will use to study abroad.

This tool also offers them, where necessary, the possibility to improve the knowledge of the language before and/or during the mobility period.

When implemented for schools, the online linguistic support will be provided as follows:

- National Agencies allocate online licences to schools according to general criteria specified by the European Commission.
- Once selected all pupils (except native speakers) benefiting from the online service will carry out an online test to assess their competences in the language they will use for studying. The results of this test will be communicated to the pupil and the school.
- Based on the number of online licences available for language courses, schools will distribute licences according to needs.
- At the end of the mobility period, pupils will carry out a second assessment to measure the progress made in the foreign language.

Further details on the online linguistic support are made available on the websites of the European Commission and National Agencies.

For languages not covered by the Commission's service, a specific grant for "linguistic support" may be provided for that purpose.

Staff in education and training and youth workers

Joint staff training events (3 days to 2 months)

Joint staff training events allow the participating organisations in the Strategic Partnership to organise short training events for education and training staff or youth workers linked to the topic or scope of the Strategic Partnership. These should be organised for small groups of staff from different countries in order to maximise the impact on each participating organisation.

They can have various formats, i.e. study visits combining on-site visits to relevant organisations, presentations, discussion workshops, training courses, etc. A balance should be kept between the participation of transnational and national participants.

Teaching and training assignments (2 to 12 months)

The aim of the activity is to strengthen the cooperation between the organisations involved in the same Strategic Partnership. The activity allows staff to develop their knowledge and understanding of European education and training systems, and helps them share and acquire professional competences, methods and practices.

This activity allows teachers/professors and other educational staff in general school education, higher education, VET or adult education working in an educational institution participating in a Strategic Partnership to undertake an assignment of 2 to 12 months abroad, teaching in a partner institution or engaging in professional activities in another partner organisation related to the field of their expertise.

The activity may consist of work in an educational institution/centre or other relevant organisation (e.g. enterprises, NGOs, school authorities, etc.), participation in structured courses or seminars (e.g. in teacher training colleges or research organisations), placements or observation periods in a company or organisation in the field of education, training or youth.

The sending institution has to ensure a fair, transparent and open selection process, to develop the content of the activity with the participant and to ensure an internal and as far as possible external recognition of this long-term mobility abroad.

As regards teaching and training assignments in higher education, the following types of sending and receiving organisations are eligible:

- For long-term staff mobility for teaching, the sending organisation can be any participating organisation while the receiving organisation must be a participating HEI.
- For long-term staff mobility for receiving training, the sending organisation must be a participating HEI while the receiving organisation can be any participating organisation.
- The sending and receiving organisations must be located in different countries and the receiving country must be different from the country of residence of the participant.

The organisations involved in the Strategic Partnership work together on developing mobility agreements, recognising the work undertaken at the partner organisation abroad and strengthening the European dimension in education and training. This activity should also be a valuable international experience for those involved in the organisation and implementation of the mobility activity at both the sending and the receiving organisation.

Mobility of youth workers (2 to 12 months)

This activity allows youth workers to experience a different working reality than the one in their home countries, increasing their professional, personal and intercultural competences. Youth workers have the possibility to work abroad for a period from 2 to 12 months actively contributing to the daily work of the receiving organisation, at the same time enriching their profile as professionals in the field.

These activities also aim at strengthening the capacities of the organisations involved, benefiting from new perspectives and experiences. Mobility activities can be carried out either as individual activities (i.e. one youth worker being sent to a receiving organisation) or in pairs, as a mutual exchange of youth workers (simultaneously or not) between the two partner organisations.

Online linguistic support

Participants in long-term mobility activities within a Strategic Partnership can benefit from linguistic preparation. In this regard, an online linguistic support will be gradually implemented in the course of the Programme. Such online support is made available by the

European Commission to selected staff and youth workers, with a view to assess their competence in the language they will use to study abroad.

This tool also offers them, where necessary, the possibility to improve the knowledge of the language before and/or during the mobility period.

When implemented for staff and youth workers, the online linguistic support will be provided as follows:

National Agencies allocate online licences to organisations according to general criteria specified by the European Commission.

Once selected all participants (except native speakers) benefiting from the online service will carry out an online test to assess their competences in the language they will use for studying. The results of this test will be communicated to the participant.

Based on the number of online licences available for language courses, organisations will distribute licences according to needs.

At the end of the mobility period, participants will carry out a second assessment to measure the progress made in the foreign language.

Further details on the online linguistic support are made available on the websites of the European Commission and National Agencies.

For languages not covered by the Commission's service, a specific grant for "linguistic support" may be provided for that purpose.
