Nederlands Loopbaankennispunt EU

Latvia

May 14th, 2020

Lessons learned

- What did we learn from other countries?
 - Different approaches – what kind of background the students have (career learning theory NL, chance to think about the grid before the consultation or following a certain order DK)
 - Different formats – Estonia/Latvia

Way forward

- How do we want to take steps forward with the career compass in our own country?

We would like to «dust off» the career matt and help school career counsellors/career teachers take a fresh look.

Next steps

- What do we need to take next step(s)?

We would like to suggest repeating the seminar as a webinar for a wider audience through the Euroguidance Serbia platform
