## Lessons learned

What did we learn from other countries?

- We were very impressed and inspired by all presentations from participating countries
- We especially liked Estonian Table top model of compass, ideal to be used with smaller groups, easier to store/transport and cheaper to produce, and ideal for smaller intimate sessions
- We also liked the approach shown in Latvian model with photocopies of each them placed on the floor, a lovely barefoot approach

## Way forward

How do we want to take steps forward with the career compass in our own country?

- We will redistribute compass to our members and other stakeholders with resumé from the webinar
- We will produce a number of tabletop-sized CC-maps and use to demonstrate at future meetings, seminars, conferences etc

## Next steps

What do we need to take next step(s)?

- We can assist any country or group of countries proceeding with CC development/toolbox in an Erasmus+ application, but we are a small organization and can not lead such a consortium
